

SUCCESS Story

FOOD PROCESSING

Nevastane XS 80

CUSTOMER PRESENTATION

- A British food processing company specialising in processing, packing and marketing herbs, spices and seasoning for use in a wide variety of foods.
- Our customer sells virtually all of the UK's leading retail and wholesale distribution foodservice companies as well as many of the major food manufacturers.

"Greasymat has significantly increased the efficiency and safety of our greasing operations. In addition, the Total Nevastane XS 80 grease contained within the Greasymat has proved to be excellent at lubricating the bearings in the harsh conditions that the machine operates in"

Engineering Manager

PRODUCT APPLICATION

Total Greasymat Automatic Grease Lubricator contains Nevastane XS 80 Food Grade grease have been applied to our customer's pasteurizing machine for the pasteurising the jars of spices.

CUSTOMER REQUEST

- The lubricant has to be able to withstand high temperatures but be resistant to water washout and also be capable of lubricating to ensure good lubrication of the bearings at these extremes of the production process.

TOTAL SOLUTION / PROPOSAL

- We offer a trial for our customer on Total Greasymat Automatic Grease Lubricator containing Nevastane XS 80 Food Grade grease.

RESULTS AND CUSTOMER BENEFITS

- Successful in keeping the bearings efficiently lubricated, and at the same time has taken away the risks associated with lubricating these bearings manually by the operatives.
- Reduced the time taken to carry out the task of lubricating the bearings, because the lubrication system is now automated.
- The Total Nevastane XS 80 Grease in the Greasymat has proved to be excellent at lubricating the bearings in the harsh conditions that the machine operates in.
